Yes, we are hiring!

WHO WE ARE?

Life and Limb is a MedTech company incorporated in 2020 where we innovate, design, and engineer biomedical devices. Our focus revolves around prostheses solutions that are cost-effective, state-of-art and custom-built for each user. We aim to revolutionize this domain with innovative solutions that are accessible, affordable and aspirational.

And we need your support to bring our first product to light – BIONICLI™, a myoelectric prosthetic hand with twelve grip patterns that can achieve more than 15% of the activities of daily living.

Position:	CAD Engineer/Industrial Designer
Probation period:	One month
Location:	DELHI-NCR
CTC/Stipend:	INR 7 LPA [with ESOP]
Employment Type:	Full-time

ABOUT YOU, YOUR ROLE!

We are looking for a multifaceted team member with skill sets in engineering, design, and analysis. You should be able to handle multiple CAD files and assemblies (Fusion 360), have an understanding of limits and tolerances, know what third angle projection is, and check emails thrice on a busy day + Google Workspace; come on!

We want to work closely with you on the problem statements and thus require your diligent participation to travel to or stay with Life and Limb's core team.

NEXT STEPS

We have tight deadlines to meet in Q1-2022. The position is for NCR/Delhi region with one month of probation, requiring you to sign an NDA and an MOU before starting the work. We can take care of your stay, food, and other bills related to relocation if you are outside NCR/Delhi. The engagement is convertible to a full-time role to define potential synergies in working together.

Are you ready for a wow-ing experience and help us dig deep into the process of building a great team? We need a quick response from you; drop a mail to admin@lifeandlimb.ai with your one-page resume/portfolio.

Welcome to Life and Limb!
