

INDUSTRIAL DESIGNER

1-2 years of experience
Bachelor's Degree in Engineering or equivalent

Yes, we are hiring!

Who we are?

Life and Limb is a MedTech company incorporated in 2020 where we innovate, design, and engineer biomedical devices. Our focus revolves around prostheses solutions that are cost-effective, state-of-art and custom-built for each user. We aim to revolutionize this domain with innovative solutions that are accessible, affordable and aspirational.

And we need your support to bring our first product to light — BIONICLI™, a myoelectric prosthetic hand with fourteen grip patterns that can achieve more than 15% of the activities of daily living.

Essential Duties and Responsibilities:

We are looking forward to expanding the core team with skill sets in handling raw 3D scan files, engineering, design, and analysis of mechanical parts. You should be able to handle multiple CAD files and assemblies and have an understanding of limits and tolerances.

- Generate 3D models from 3D scans and use commercial and research software to design patient-specific prostheses mimicking the anatomical features of the human hand,
- Perform tasks under the company's defined milestones and work independently to achieve project goals,
- Parametric model generation for modulating the mechanism and the CAD features,
- Work with surfacing and form tools in the CAD environment, and
- Work with all the core team members to facilitate and implement new designs, engineering changes, and desk research for generating high-quality renders.

Qualifications:

- Minimum of 1-2 years of experience using 3D CAD modeling software,
- Knowledge of Autodesk FUSION 360 is mandatory, and
- Bachelor's Degree in Engineering or equivalent education or job experience.

Skills, Abilities, Competencies Required:

- Must have excellent interpersonal and communication skills (verbal and written).
- Willingness to work flexible hours as needed.
- Be able to follow detailed procedures and ensure accuracy and quality in documentation and data.
- Must have the ability to adapt to changing pace within the company, with frequent interruptions.
- Must demonstrate flexibility and willingness to adapt to diverse roles as a member of the core team.
- Willingness to learn needed skills on the job in order to enhance performance.
- Proficient in using Google Workspace.

What's next?

We have tight deadlines to meet in Q3-2022. The position is for the Delhi/NCR location with one month of probation, requiring you to sign a confidentiality/non-disclosure agreement and an employment agreement before starting the work. We can take care of your stay, food, and other bills related to relocation if you are outside NCR/Delhi and want to move to the office/workshop location.

Are you ready for a wow-ing experience and help us dig deep into the process of building a great team?

We need a quick response from you; drop a mail to admin@lifeandlimb.ai with your one-page resume/portfolio.

Life and Limb is an Equal Opportunity Employer!
