## Mentor MANTRA

Mr. Rony Banerjee

Rony Banerjee is a seasoned professional with an extensive background spanning over 27 years in diverse development initiatives and brings a wealth of expertise and experience to the table. Recently he has authored a book titled "Is there a Rocket fuel for startups?", presented and made Public in India by: UK Asian Business Council, United Kingdom

### Green Grit: Small, Action-Oriented Startups Fueling India's Climate Response

As the world shifts toward climate-resilient growth, a new generation of Indian startups is emerging—small in scale but bold in action. These enterprises, often led by first-time entrepreneurs, are making a tangible impact by integrating sustainability into everyday business models.

For instance, vegetable vendors are adopting biodegradable packaging, while companies offering quick deliveries are reducing plastic waste with paper bags. Grassroots efforts led by micro-innovators, like those creating honeycomb paper, show that climate action isn't just for big corporations. Startups are entering green value chains and reaching remote rural households by using digital marketplaces and climate financing platforms. Government initiatives and private platforms supporting carbon credit generation are boosting this ecosystem, as low-cost tech tools and policy incentives lower barriers for climate-oriented entrepreneurs.

India is setting a new standard—where sustainability is not just an elite agenda but a viable livelihood strategy. This movement transcends mere carbon reduction; it is about restoring dignity, enabling inclusion, and creating scalable models of environmental entrepreneurship.

Now is the best time for climate action startups in India, driven by a growing climate-conscious consumer base that is seeking sustainable alternatives. Availability of climate financing tools like carbon credits and green MSME loans

Favorable government schemes supporting eco-enterprise innovation and infrastructure

Digital platforms enabling access to global markets and verifiers

Rising investor interest in ESG-aligned, impact-driven micro-enterprises

With supportive policy tailwinds, expanding sustainability networks, and global urgency around climate action, now is the time for India's smallest enterprises to make the biggest difference. The path forward is not just green—it's inclusive, innovative, and impact-first.

# CONTENTS

## New Incubation

New startups with novel and innovative technologies have been incubated at SIIC, IIT Kanpur during January. Read on to learn about the startups.

Refer to the section for more details.

Page No:

1

## Monthly Timeline

Take a deeper look into the exhilarating developments within the thriving SIIC-IIT Kanpur ecosystem throughout the month.

Refer to the section for more details.

Page No:

02

## Program Highlights

Learn about some outstanding accomplishments in the various program verticals that are currently up and running at SIIC, IIT Kanpur

Refer to the section for more details.

Page No:

03-04

## Success Stories

Know more about the inspiring startups that have elevated our incubation ecosystem with their remarkable accomplishments on a national scale.

Refer to the section for more details.

# MILESTONE ALERT

40 new companies incubated last month!

Pattuthadam      HAB Biomass      Matolutions

Malhari Projects      Prayas Greentech

Teamstarbase

Eunoia Innovations      Avris Environment Technologies

GG Wastech      Prahana Products

Cococraft Green Ventures      Vital Carbon

Shiniunicorns Solar Technologies      Bhojpatta Agripreneur

Gusteau Foods      Shhroomi Farms      F2DF

Impensus Electronics      Sarva Suvidhaen

Net Zero Initiative      AACGF Solutions      Adiabatic Technologies

Carrus Mobility      C-Disc Technologies

Computational Imaging Tech      Encamp Tourism

Indijan Activated Agrifood

Kuppismart Solutions      Leofelis Instruments

Vertex Labs      Carbonation India

Hoof and Foot      Neuroscape Imaging

Ilandlo Services      Radongrow

Farmplex

IPanelKlean Solar      Agspert Technologies

3R ZeroWaste      Aathma Pranavaayu

23rd April 25

SIIC, IIT Kanpur, and NMexus entered a strategic collaboration to expand global outreach and strengthen innovation ties. Key focus areas include soft-landing and market access for SIIC and IITK First startups, promotion of IIT Kanpur's innovation ecosystem in the U.S., a structured referral and revenue-sharing model, co-branded events and delegations, joint incubation and technology commercialization, alumni-led venture support, and enhanced faculty, mentor, and technical linkages.

# PROGRAM

## Highlights

STARTUP  
INCUBATION AND  
INNOVATION  
CENTRE  
IIT KANPUR

SIIC, IIT Kanpur, in collaboration with BFI and DST NIDHI MedTech Centre, hosted a workshop on "Mastering Finance and Compliance for Sustainable Growth." IIM Nagpur's Prof. Shailendra Nigam and Prof. Prashant Gupta offered insightful guidance on financial planning, legal frameworks, and sustainable growth strategies, helping early-stage startups strengthen their foundations and plan confidently for the future.

[Read More](#)

SIIC, IIT Kanpur, conducted an expert talk at PSIT College on "Empowering Innovation: AI Centre of Excellence and Startup Incubation." Domain experts Mr. Vasav Krishna and Mr. Animesh Mishra shared their experiences in AI/ML and Defence & Aerospace, offering students valuable insights into deep-tech innovation and the vibrant startup ecosystem, encouraging them to explore future opportunities in entrepreneurship and research.

[Read More](#)

On World Creativity and Innovation Day, Prof. Vivek Kant, Associate Professor, Department of Design, led an engaging workshop on human-centered innovation in product development. He emphasized the value of multidisciplinary collaboration and encouraged startups to focus on building diverse teams and creating Minimum Desirable Products (MDPs) that truly prioritize user needs and satisfaction.

[Read More](#)

At Startup Mahakumbh 2025, over 20 SIIC-incubated deep-tech startups from defence, MedTech, cleantech, and AgriTech were showcased. The pavilion facilitated impactful connections between founders, investors, and policymakers, offering startups valuable networking opportunities, exposure to investors, and insights from industry leaders, boosting their growth and collaboration potential.

# PROGRAM

## Highlights

Maj. Gen. Rajiv Chauhan, ADG, Artillery Directorate, visited on April 5, 2025, engaging with startups in Defence, Aerospace, and AI. His interaction provided key insights on aligning military needs with emerging technologies, inspiring innovators and reinforcing their commitment to defense preparedness and self-reliance.

[Read More](#)

At Medical Fair India 2025, held from March 27–29, SIIC engaged in key discussions and collaborations in MedTech and diagnostics. Dr. Deepti Chugh joined a panel at Clin Lab India Conference on "Empowering Rural India with Diagnostics." The event hosted 350+ exhibitors from over 15 countries, fostering global partnerships.

[Read More](#)

On March 27, 2025, a one-day Immersion Program under the AMRIT initiative welcomed NIPER Raebareli researchers for industry-academia-startup collaboration. Sessions by experts from the Department of Pharmaceuticals, Boehringer Ingelheim India, and Real Time Angel Fund offered hands-on exposure to IIT Kanpur's deep-tech innovations.

[Read More](#)

At Rakshakriti, the defence symposium at Techkriti 2025, SIIC showcased cutting-edge technologies for the Army, Navy, and paramilitary forces. Chief of Defence Staff Gen. Anil Chauhan PVSM visited the expo, where startups like Aethrone Aerospace and EkVayu Tech presented innovations. The event highlighted SIIC's role in advancing self-reliant defence technologies.

### ScaNxt Signs MoU with Madhya Pradesh for Climate Smart Gram Panchayats

ScaNxt Scientific Technologies signed an MoU with the Government of Madhya Pradesh, supported by IFC, to establish Climate Smart Gram Panchayats across the state. The initiative will boost horticulture exports by leveraging AI/ML and IoT technologies for soil diagnostics, pest management, and crop monitoring. The MoU was signed at the Invest Madhya Pradesh Global Investors Summit in Bhopal.

### Medantrik® MedTech Conducts Seminar on AI in Healthcare at GSVM Medical College, Kanpur

Medantrik® MedTech, an SIIC IIT Kanpur-incubated startup, held a seminar at GSVM Medical College, Kanpur, focusing on the future of AI in healthcare. CEO Priyaranjan Tiwari discussed AI-driven innovations, including India's first personalized respiratory device for asthma and COPD patients. Expert mentorship from Dr. Anand Kumar and support from Dr. Sanjay Kala highlighted AI's potential in enhancing patient care and medical education.

### Pacing Grass Secures Indian Patent for Bamboo Fiber Composite Innovation

Pacing Grass Private Limited has been granted a patent in India for its breakthrough bamboo fiber composite material. The company is redefining sustainability by transforming bamboo and crop waste into climate-smart, eco-friendly bio-composite solutions. This innovation not only advances circular economy practices but also strengthens India's position as a rising force in green manufacturing.

Full Video](#)

## MARAAL AEROSPACE

In this edition of Innovator Se Baat, we feature Maral Aerospace, a deep-tech defense startup co-founded by Vivek Kumar Pandey, building India's first solar-powered fixed-wing UAV designed specifically for long-endurance strategic missions. With a 12-hour flight time, 150 km one-way range, and an operational altitude of 5 km, Maral's drone is built for critical ISR (Intelligence, Surveillance, and Reconnaissance) operations across India's vast and sensitive borders.

Vivek, an expert in military-grade systems and a former designer of DRDO's Pinaka rocket launcher consoles, teamed up with Dr. Vijay Shankar Dwivedi to create a next-generation UAV platform rooted in indigenous innovation. Incubated at IIT Kanpur's SIIC, Maral Aerospace is quietly powering India's boldest frontlines by addressing deep operational gaps in drone endurance, altitude, and autonomy.

RP (Rishabh Pandey): What is the core innovation of Maral Aerospace, and how does your product address the needs of the Indian Armed Forces?

Vivek Kumar Pandey (VKP): Our core innovation is a solar-powered fixed-wing drone designed specifically to overcome the endurance and range limitations of existing UAVs in India. Most Indian drones offer only 2-hour endurance and 15–20 km range, which limits strategic operations for the Army, Navy, and Air Force. To overcome this, we innovated a solar-powered fixed-wing drone, combining high-efficiency (24%) solar cells with battery backup. This enables 12-hour flight endurance and a 150 km one-way range—total operational coverage of over 600 km per sortie. Designed to fly at 6.5 km, it currently operates reliably at 5 km altitude, making it a game-changer in India's defense ISR landscape.

RP: What inspired you to start Maral Aerospace, especially in a capital-intensive sector like defense?

VKP: The idea began when the main founder, Dr. Vijay Shankar Dwivedi, and I worked at a Noida-based drone startup. My background is in military-grade systems—I designed Pinaka rocket launcher consoles and simulators under DRDO projects, mentored by Prof. A.K. Ghosh and Prof. Kamat from IIT Kanpur. Prof. Kamat led India's first solar UAV project, funded by ADA (a DRDO lab), which inspired us. In 2022, Vijay and I joined Alcomponics, where we worked on DRDO's DCPD and defense programs. We also participated in DRDO's Defense Innovation Challenge with a concept for a solar UAV acting as a High Altitude Pseudo Satellite (HAPS).

However, the company leadership couldn't grasp defense incubation or TDF (Technology Development Fund), which offers grants up to ₹50 crore. Realizing the potential and national need, we decided to start our own venture in August 2023. By October, Maral Aerospace was formally incorporated in Noida with Wing Commander R.K. Sharma joining as investor and co-founder. We got incubated at IIT Kanpur and expanded to a 3000 sq. ft. facility in Technopark. Our 12-meter fixed-wing drone, developed from Vijay's Ph.D. work, is now a rugged ISR-ready system. The prototype is built, and test flights are scheduled for late May.

RP: What was the turning point when you realized that this was no longer just a lab project, but a serious company building for the Indian armed forces?

VKP: I think when we started flying our own aircraft and started getting good performance, we realized we were solving real problems. And then when people from DRDO started visiting us and said, "You've built something interesting. Can you build something for us?"—that was a moment. It was like, okay, people who matter are noticing. And that gave us the confidence that we can build for India's armed forces. We're not just doing research—we're building for the real world.

RP: Maral is a deep-tech startup in aerospace—hard tech that needs time and patience. How did SIIC IIT Kanpur support your early journey?

VKP: Honestly, I don't think we would be here without SIIC. We started as a student project, and when we realized this is something real, SIIC gave us space, funding, and time. The mentoring, the resources, and especially the trust—they believed in us when we just had a flying prototype. That early support is rare, and it gave us the runway to build what we are building today.

RP: How can India's defense forces benefit from Maral?

VKP: Maral's drone is designed for use across all three wings—Army, Navy, and Air Force. With 12-hour endurance, 150 km range, and 5 km altitude operation, it enables 24x7 surveillance in remote terrains, precision artillery correction, and target geolocation without detection.

It can act as a radio relay in mountainous, non-line-of-sight areas, support search and rescue missions, and operate from -20°C to +55°C, ensuring all-terrain readiness. Though not a logistic drone, it supports light payload delivery. Its deployment across India's vast land and marine borders would significantly enhance operational capabilities.

"When you realize  
the nation needs—  
you build, you  
launch, and you  
serve."
